

Will the REAL World Trade Center Please Stand UP?

The picture on the left is a perfect example of what happens when politicians spend billions of public dollars looking after special interests. Public property is being rebuilt with public dollars as if the not-so-special public *doesn't exist*.

This does not have to happen. There is a plan ready to restore America's Skyline with 21st-century Twin Towers beside the 9/11 Memorial. It could actually be completed years ahead of the current schedule and would cost billions less.

And unlike the current plan, "Twin Towers II" has strong support from 9/11 Families and the American People.

There is an elegant solution to this disgraceful situation. For more details call 212-568-0207 or visit:
